Notes in Explanation of Catalogue

The figures following each variety indicate in feet the approximate height of that plant in maturity. Ample allowance has been made for the many physical factors that tend to modify the growth of plants in cultivation.

The botanical and common names are taken from "Standardized Plant Names," which is the accepted authority on plant nomenclature in the horticultural industry.

Our standard of grading all plants is based on a schedule which has been adopted by the American Association of Nurserymen.

EXTRA CHARGE FOR BALLING

We recommend that all varieties marked with an asterisk(*) be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way.

IMPORTANT

We have made careful studies of actual balling costs of different types of plants under varying soil and weather conditions. The following schedule is the result of several years cost records plus a moderate profit margin.

How to Reach Princeton by Auto or Train

We are located midway between New York and Philadelphia. Both the Lincoln Highway and the new Super-Highway (Route 26) pass our nurseries.

The office of Princeton Nurseries is located on Lake Road in the township of Kingston, New Jersey.

The nearest railroad stations are at Princeton and Princeton Junction, on the main line of the Pennsylvania Railroad. Phone Princeton 1776 or 1777 and we will be glad to come and meet you at either place.

The New York-Washington planes pass over our nursery hourly. When travelling by airplane, watch out for the interesting block arrangement from the air.

We would call your attention to the fact that we have one of the largest nurseries in the country with over 1000 acres of nursery stock. We are growing between 1100-1200 varieties of hardy woody ornamentals.

A cordial invitation is hereby given to visit our nursery at any time.
